

Box plot showing the distribution of the number of publications (N) for four categories: B (green), IR (orange), OR (blue), and N (dark blue). The y-axis represents the number of publications, ranging from 0 to 100. The x-axis labels are B, IR, OR, and N. The B category has a median around 10, with many outliers up to 100. The IR category has a median around 25, with a range from 10 to 50. The OR category has a median around 45, with a range from 20 to 100. The N category has a median around 5, with a range from 0 to 10 and one outlier at 10.
